SPACE COMMANDER

# Warranty

Space Commander™ Limited 10 Year Warranty

The **Space Commander™** range became the garage storage cabinet market leader shortly after it was launched in 2004. We are recognised throughout Australia and New Zealand as the innovator and leader in design, quality, engineering, security, longevity, functionality and value for money in the apartment garage storage category.

With our 20 year anniversary fast approaching in 2024, and our record of continuous operation under the same ownership by the founders since 2004, we are very pleased to offer the **Space Commander Quality Promise and Warranty.**

Our 10 Year limited warranty is backed by real experience and a proven track record. We have seen cheaper competitors come and go over the years who may offer a 5 or 10 year warranty, but go out of business within 2 to 3 years. So even if we might be slightly more expensive than the cheap copies, you know that we will be around in 5, 10, 15 years to attend to your Space Commander if ever the need arises!

Accordingly, all **Space Commander™** storage units now come with the following Warranty:

- **10 Years** – on all powder-coated sheet metal panels that comprise the structure (for materials and labour against any manufacturing or installation defects).
- **5 Years** – on all hardware components (gas struts, locking devices etc.). Your storage unit is automatically registered for the Warranty upon the completion of your purchase, installation and payment
