LIGHTING CONTROL APP SCREEN

Welcome to the Legrand Home Lighting Control App.

Legrand's Home Lighting Control app is designed to provide a guick, easy, mobile option for accessing your Legrand Home Lighting Control system. From your Lighting Control app, you have the option to turn on or off any or all lights discovered by the system, view recently created or upcoming scenes, and go to the lights, scenes, or settings pages for customization options.

To help you learn the basics of using your new Lighting Control system, this brochure provides explanations and screen shots for the icons you will see in the app*. Legrand's Home Lighting Control app is available for download onto any of your iOS and Android smartphones and tablets through the App Store or the Google Play Marketplace.

Let's light it up!

*The screen examples used in this brochure may differ from the screens you see when accessing the Lighting Control app. Screen displays are dependent on the device used to access the app and the products integrated with your system.

The Main Screen.

Scenes are automated lighting rules you create to help keep your house safe and inviting. Design the perfect scene for your lifestyle:

- Cycle your lights automatically so it appears you are home while on vacation
- Set a scene to turn ON the hall light right before you get home at night.
- Tap this symbol to create a scene.

More Options.

Manage your list of scenes with ease. Add. Edit. Remove. Control is at the tip of your finger.

- Edit Make a change to your scene by updating the recurrence, date, time, or fade rate.
- + Add more lighting rules so your system can make your life easier.
- > Duplicate or delete a scene with a touch.

The Main Screen.

Customization that goes a step beyond to help add structure to your automization options.

- Add in-wall scene controllers for more flexibility in your system.
- Check on software updates and app versioning.
- Control and monitor your system while away from home by setting up a Samsung ARTIK Powered by Cloud™ account.

More Options.

Set things up for your scenes by automating the automation!

Location - Use an interactive map, or your zip code, to help your system learn the appropriate sunrise and sunset times for your relative time scenes.

Time Zone - Set your time zone so your scenes trigger on time!

Toggle daylight savings time ON or OFF to match the time zone where you live.
