## Internal Fabric Cleaning & Maintenance

---

### Cleaning & Maintenance instructions for Fabric:

Fabric may be cleaned by occasional vacuuming to remove dust. For stained fabric, wipe the fabric with a clean sponge and mild detergent or dish soap and thoroughly rinse. Allow the fabric to dry completely before raising.

Any mild cleaning product should first be tested on a small, inconspicuous area prior to a broad application on the fabric.

Do not completely immerse the fabric.

We do not recommend commercial spot cleaners or diluted bleach mixtures, but if used, it is at your own risk and should be tested first. Do not use cleaning methods involving heat, bleach, abrasives, or solvents. Use of these methods will void the warranty.

Ultrasonic cleaning is also recommended by a specialist cleaning company.

We recommend that fabrics and hardware be cleaned every six months.

### Cleaning & Maintenance Instructions for Hardware:

Use mild detergent and a soft brush or cloth to clean hardware when required. Do not use harmful chemicals or abrasive products.
